

**ASTR129: INTRODUCTORY ASTRONOMY I**  
**Beginning-of-Semester Survey    Fall 2011**

1. My name in the CofC records is \_\_\_\_\_,  
but I prefer to be called \_\_\_\_\_
2. Academic Standing:    Freshman    Sophomore    Junior    Senior    Other
3. Major:
4. What is your hometown? (We will be comparing how the sky looks from different places on Earth, so it's helpful for me to know where everyone is from)
5. Why are you taking this course?
6. What other college-level science courses have you taken or plan to take?
7. Was Astronomy a part of your high school physical science curriculum? Have you had any previous education or experience with astronomy?
8. Pose a question you'd really like to have answered in this course. It can have anything to do with the sky, the planets, space exploration, or even everyday things that seem to be related to astronomy. No questions about black holes, cosmology, or anything like that yet (we cover those in the second semester).
9. What are your biggest concerns about taking this course? Why?
10. If you have any special needs, scheduling conflicts, etc., please let me know about them now, if you can...
